EXPERIMENT 8

REG NO: 240701272 **Name:** Kishor Kumar Purushothaman

AIM:

To create storyboards representing the user flow for a mobile food delivery application using Balsamiq.

PROCEDURE:

• Tool Used: Balsamiq.

• A new project was created and mobile screens were added to represent the food ordering process.

• Multiple screens were designed to show each stage of the user journey.

• UI components such as buttons, text fields, images, and lists were used.

• The design was kept simple to clearly represent user interaction and flow.

USER FLOW:

• Homepage – Search and browse restaurants.

• Restaurant Screen – View items and add to cart.

• Cart – Review selected items and total.

• Checkout – Enter delivery details and choose payment.

• Confirmation – Displays successful order message.

SCREEN DESCRIPTION:

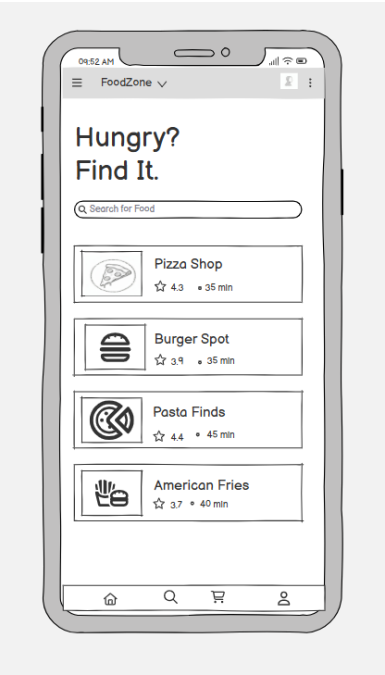
• **Homepage:** Includes search bar and restaurant list. Entry point for users.

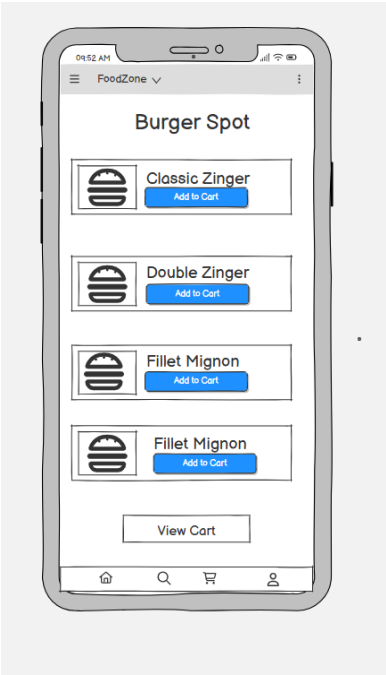
• **Restaurant Screen:** Displays food items with add to cart option.

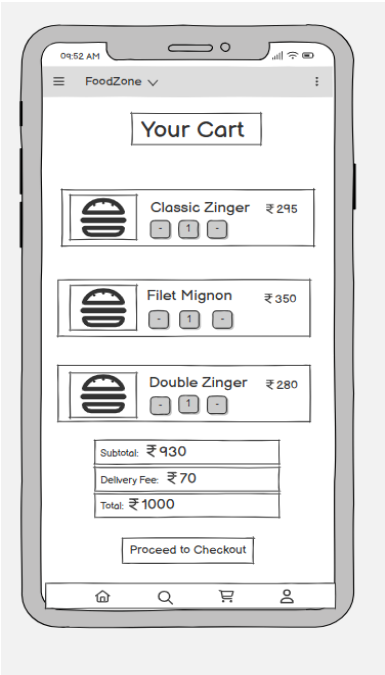
• **Cart Screen:** Shows selected items, quantity and total.

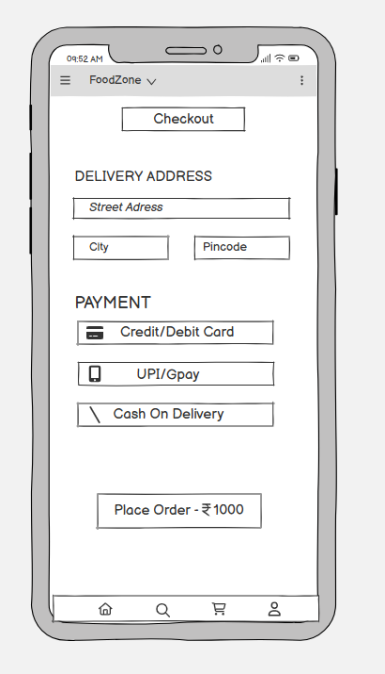
• **Checkout Screen:** User enters address and selects payment method.

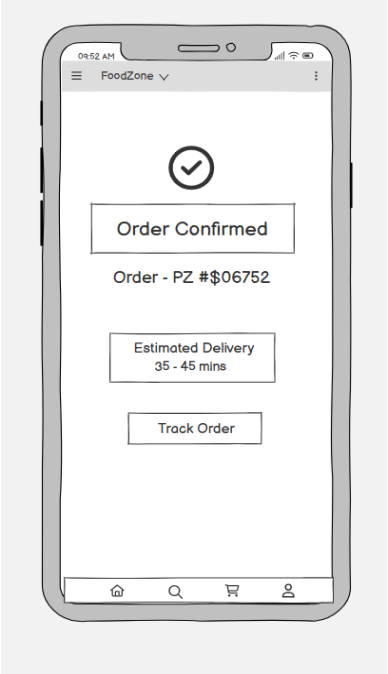
• **Order Confirmation:** Displays order success and delivery time.











RESULT:

Thus, a storyboard representing the user flow of a food delivery application was successfully created using Balsamiq, covering all stages from browsing to order confirmation.
